ABOUT THE CONFERENCE

With the rapid development and increasing complexity of computer and informatics, user's requirements for trusted computing and informatics systems are becoming more and more demanding. Useful and innovative technologies in these areas are attracting researchers. This National Conference on Contemporary Computing and Informatics (NCCI) aims to bring together researchers, academicians, scholars and experts from various backgrounds and application areas in Computer Science and Engineering. This conference will provide a platform for interaction to achieve exchange of ideas in new and emerging computer and informatics areas. It will also serve as a platform to cover the advanced aspects and approaches of computers and informatics in real world scenario and provides a forum to present and discuss emerging ideas and trends in this highly challenging research field. This conference is expected to strengthen relationships and ties with other institutions, Industrial personnel, scientists, and to facilitate joint research. The conference intends to be an open forum and chance for presenting, discussing, sharing the latest experiences and exchange findings.
