4 ACADEMIC DEPARTMENTS OFFERING PG PROGRAMMES

4.1 DEPARTMENT OF CIVIL ENGINEERING

The Civil Engineering Department established in 1962, in Madan Mohan Malaviya University of Technology, Gorakhpur, is one of the oldest departments of the University, working since its inception. The department has, over the years, established its status as a centre for imparting high-quality technical education to undergraduate and post-graduate students and extending consultancy services to industries and various government departments located in the Eastern U.P. Besides the undergraduate course of B.Tech. (Civil Engineering), the department offers three regular P.G. courses viz. M.Tech. in Seismic Design and Earthquake Engineering and, M.Tech. in Structural Engineering and M. Tech. in Environmental Engineering. The facilities for doctoral research are also available in the department.

The department has experienced and highly qualified faculty members. The department capitalizes on its well-qualified and dedicated faculty, which is clambering for achieving excellence. Further, the strength of the department also lies in the strong linkages, it has with its alumni and various government/private organizations located in the region. The alumni of the department are well placed in various govt. / private organizations and are in close contact with the department. The department has been continuously interacting with various government and private organizations in the form of consultancy works, expert advice, design projects, etc.

With the strength of faculty, the department has the potential to raise the standards of technical education to any desired level, if infrastructural facilities are augmented. Needless to mention, the university itself is located in the underdeveloped region of eastern U.P., which is both flood and drought-prone and lacks industrial development. These special needs of this under-developed region can only be tackled by us, because of our understanding of the local conditions. The department has following full-fledged laboratories equipped with internet facility through LAN.
